SKY X4C

GPU and CPU Upgradeable 15.6" Mobile Supercomputer

The Sky X4C packs more power than most desktops into a 15.6 inch laptop form factor. Equipped with a fully unlocked Intel i9 9900K CPU, you won't have any trouble running demanding simulations and intense workloads with this pocket rocket! Armed with your choice of MXM 3 NVIDIA's GeForce RTX 2080, 2070 or 2060 card, you will be able to perform heavy-duty rendering and run the latest games on high settings, no problem! You can choose from a FHD, 120 Hz or an UHD display. You also have a wide selection of memory options, starting from 8 GB all the way up to 128GB of DDR4 RAM! In the storage department, we offer you room for up to 4 storage drives for a maximum storage capacity of up to 24TB! Further, your data will be protected with a Kensington lock, biometric security, and Trusted Platform Module (TPM) data encryption. TPM encrypts all your data so only you have access to it, even if your machine is misplaced or stolen. The X4C also comes with a fully backlit keyboard & dedicated lighting software.
